Delfin Vacuum Models

DM

Industrial single-phase vacuums with high versatility.

- Great for mobile applications and confined spaces.
- The DM series is the best selling Delfin vacuum across the widest range of industries.
- Certified explosion-proof models available.

Mistral

Delfin's most compact, diverse range of industrial vacuums.

- Single and three-phase systems available.
- Widest selection of models for collection of solids and liquids.
- Certified explosion-proof models available.

DG

Industrial three-phase vacuums with high versatility.

- Built for continuous use with large collection capacity.
- Certified explosion-proof models available.

ZEFIRO

Ultra compact three-phase vacuum cleaners.

- Vertical platform ideal for mobile applications and confined spaces.
- Suited for continuous use.

air

Compressed air-operated vacuum cleaners for continuous use.

- Flexible solutions for most non-electric environments.
- Diverse range of models for collection of solids and liquids.

What do you need to know?

NFPA 652 defines combustible dust as a “finely divided combustible particle solid that presents a flash fire hazard or explosion hazard when suspended in air or the process-specific oxidizing medium over a range of concentrations”.

This applies to all facilities that manufacture, blend, package, repackage, convey, handle combustible dust, or particulate solids that may become dust.

In the event of the above, each industrial setting must have:

- Dust type test result saved on file.
- A complete Dust Hazard Analysis.
- A documented housekeeping procedure.
- A certified industrial vacuums system (recommended).

Class I:

	Division	Description	Group
Gases, Vapors, Liquids	Div 1	Hazard is normally present.	D
	Div 2	Hazard is abnormally present.	D

Class II:

	Division	Description	Group
Dust	Div 1	Hazard is normally present.	E, F, G
	Div 2	Hazard is abnormally present.	F, G

Division 1 location exists where combustible dust is normally in suspension in the air in sufficient quantities to produce ignitable materials, or where mechanical failure or abnormal operation of equipment might cause an explosion or ignitable dust-air mixture to be produced.

Division 2 locations exist where combustible dust is not normally in the air in sufficient quantities to produce an explosion, and dust accumulations are not normally sufficient to interfere with the normal operation of electrical equipment.

Type of Material	Group	Typical Materials
Electrically Conductive Dusts	E*	Powdered metals, such as aluminum or magnesium
Carbonaceous Dusts	F	Carbon black, coal dust, coke dust
Agricultural Dusts	G	Grain, flours, sugars, spices, rice, certain polymers

*Group E Metal Dust requires an immersion pre-separator

How does a dust explosion occur?

When the following elements combine at the same time:

Combustible Dust:

The fuel to burn for the explosion. It hoards in high spot areas or out of sight areas.

Oxygen in Air:

Fire needs oxygen to burn, and it can be found almost everywhere.

Dispersion:

Hoarded dust can easily become a dust cloud suspended in the air, increasing the explosion hazard.

Confinement:

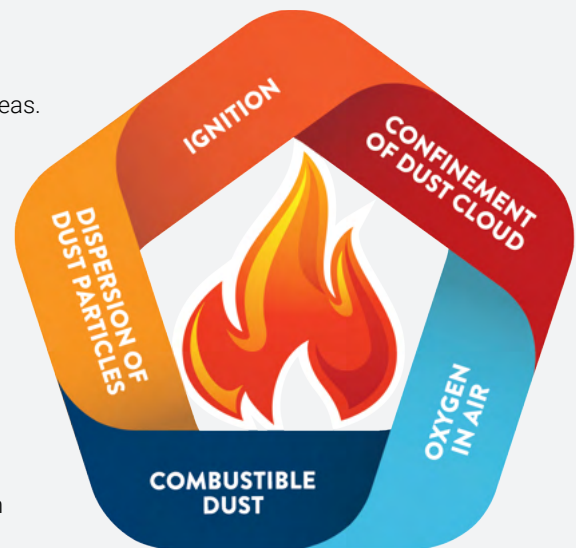

Dust confined in closed areas cannot be dispersed and increases dust particle concentration.

Ignition:

The element that triggers explosions. The ignition source can vary and also can depend on what the dust is made from.

Other things to consider:

- Some materials become combustible only when in dust form.
- After a first explosion dust is dispersed into the air, which could result in a, more deadly, secondary explosion.

Mistral 300 BL D2 Industrial Vacuum

Class II, Division 2

The most compact dust extractor. This petite industrial vacuum has plenty of power with its single-phase motor. Ideal for dust suction with its large surface industrial filter.

Features:

- AISI 304 Stainless steel collection tank.
- Powerful brushless motor with 10,000 hour life expectancy.
- No need for maintenance of the motor.

Voltage:	115 V - 60 Hz	Dimensions:	18" x 17" x 31"
Power:	1.5-HP	Weight:	55-lb
Waterlift:	90.6"	Noise Level:	78 dBA
Airflow:	121.8 CFM	Suction Inlet:	50 mm
Capacity:	3-gal	Filter Surface:	24 sq. ft.

Replacement Filters

473-1298	Class M Anti-Static Star Filter	EA
473-1001	Class H HEPA Filter	EA

Mistral 201 BL D2 Industrial Vacuum

Class II, Division 2

A NRTL certified, explosion-proof vacuum with the power and versatility to maintain peak performance for long hours. Features a single-phase motor, making it ideal for dust suction in hazardous locations.

Features:

- AISI 304 stainless steel collection tank.
- Powerful brushless motor with 10,000 hour life expectancy.
- Pressure relief valve and clog gauge for filter/motor protection.
- No need for maintenance of the motor.

Mistral 301 BL D2 Industrial Vacuum

Class II, Division 2

A robust and powerful vacuum with its spark-free brushless single-phase motor. This machine is meant for potentially hazardous dust extraction, as it is sturdy and dependable yet easy to operate. A great entry-level industrial vacuum system for numerous types of work environments.

Features:

- AISI 304 Stainless steel collection tank.
- Powerful brushless motor with 10,000 hour life expectancy.
- Dustop reverse pulse cleaning system with performance indicator light.

Voltage:	115 V - 60 Hz	Dimensions:	18" x 19" x 34"
Power:	1.5-HP	Weight:	55-lb
Waterlift:	90.6"	Noise Level:	78 dBA
Airflow:	121.8 CFM	Suction Inlet:	50 mm
Capacity:	4-gal	Filter Surface:	26 sq. ft.

Mistral 451 BL D2 Industrial Vacuum

Class II, Division 2

A compact and powerful industrial vacuum cleaner, perfect for general cleaning or for collecting dust. Meets requirements for Class II, Group F and G dust collection. The brushless motor is estimated at 10,000 working hour life expectancy. Bonded and grounding included and constructed from powder coated steel.

Features:

- Spark free brushless motor.
- Removable stainless steel collection tank.
- Accessory basket included.
- Integrated cleaning system.
- Performance indicator light.

Mistral

Voltage:	115 V - 60 Hz	Dimensions:	23" x 25" x 53"
Power:	1.5-HP	Weight:	121-lb

Mistral 201 DS CI & II D1 Industrial Vacuum

Class I, Division 1 and 2

A versatile and lightweight vacuum that solves cleaning and dust extraction problems. Meets requirements for Class I, Group D and Class II, Division 1 and 2 Group E*, F, and G dust collection. Its compact size ensures easy mobility without lacking power and performance, while the unique technical features make it the best vacuum system in its category.

Features:

- AISI 304 Stainless steel construction and anti-static polyester filter with additional HEPA filtration.
- Option to direct bag into disposable bags.

Mistral

DM1 BL D2 Industrial Vacuum

Class II, Division 2

Ideal for suctioning large amounts of dust and solids from hazardous locations. This vacuum meets the requirements for Class II, Group F and G dust collection. Features a compact/mobile AISI 304 stainless steel collection tank, a large surface anti-static filter, and an integrated filter cleaning system with an ergonomic designed manual filter shaker.

Features:

- Powerful brushless motor with 10,000 hour life expectancy.
- No need for maintenance of the motor.
- Pressure relief valve for motor protection.
- Vacuum gauge to detect filter clogging.

*Group E Metal Dust requires an immersion pre-separator.

DG KW5 D2 Industrial Vacuum

Class II, Division 2

The best power/collection capacity rate to manage dense and potentially combustible dust types. Provides great advantages for time management and product quality, while simultaneously assisting in waste reduction. Features a maintenance free side channel blower for continuous use and a stainless steel AISI304 collection tank.

Features:

- Compact and mobile design with earth grounding.
- Tangential suction inlet with separation cyclone.
- Integrated filter cleaning system.
- Pressure relief valve and clog gauge for filter/motor protection.

Voltage:	460 V - 60 Hz	Dimensions:	26" x 47" x 57"
Power:	6.2-HP	Weight:	302-lb
Waterlift:	120.4"	Noise Level:	72 dBA
Airflow:	229.5 CFM	Suction Inlet:	80 mm
Capacity:	26-gal	Filter Surface:	32 sq. ft.

473-1003	Anti-Static Disposable Waste Bag	EA

DG KW4 D1 Industrial Vacuum

Class I, Division 2; Class II, Divisions 1 and 2

A vacuum with high power, filtration efficiency, and collection capacity. Meets requirements for Class I, Division 2 Group D and Class II, Divisions 1 and 2 Group E*, F, and G. This is a robust system suited for workplaces that easily become plagued by hazardous dust, whether its potentially combustible or carcinogenic. Features a full AISI 304 stainless steel construction and a compact mobile design with earth grounding, and an added HEPA filter.

Features:

- Maintenance free side channel blower for continuous use.
- Tangential suction inlet with separation cyclone.
- Pressure relief valve and clog gauge for filter/motor protection.
- Integrated filter cleaning system.

DG 86AF D2 Industrial Vacuum

Class II, Division 2

A beacon of innovation in the industrial realm of three-phase vacuums with its sturdy, AISI 304 stainless steel collection tank. This vacuum is compact but top of its category for power level and ability. Its advanced airflow performance allows up to 4 users to be cleaning.

Features:

- Maintenance free side channel blower for continuous use with no maintenance up to 30,000 hours.
- Integrated filter cleaning system.
- Pressure relief valve and clog gauge for filter/motor protection.

Voltage:	460 V - 60 Hz	Dimensions:	26" x 47" x 69"
Power:	11.5-HP	Weight:	397-lb
Waterlift:	108.4"	Noise Level:	75 dBA
Airflow:	482.6 CFM	Suction Inlet:	80 mm
Capacity:	26-gal	Filter Surface:	53.8 sq. ft.

*Group E Metal Dust requires an immersion pre-seperant.

Airex 20 DS HEPA Vacuum

Class I, Division 2; Class II, Divisions 1 and 2

A lightweight pneumatic vacuum that's safe for cleaning in ATEX zones 1, 2, 21 and 22. Also, NFPA compliant for Class I, Division 2, Group D, and Class II, Divisions 1 and 2, Groups E*, F, and G requirements. A large surface polyester anti-static filter improves the performance and decreases the chances of clogging. Grounded and 100% AISI 304 stainless steel construction is the ideal solution for cleaning up dust and solids mixed with liquids in hazardous areas where compressed air is preferable to electricity.

Features:

- Compact, portable, and constructed with steel.
- Maintenance free Venturi system for continuous use.
- Low air consumption.
- Removable stainless steel collection tank.
- Dustop reverse pulse cleaning system.

Air Supply Pressure:	87 psi	Dimensions:	20" x 19" x 39"
Air Supply Hose:	3/8"	Weight:	79-lb

Ensure Proper Conductivity

Explosion-Proof vacuums located on pages 4 to 7 should only be used with accessories found on pages 7 and 8.

Overhead Tools

Overhead cleaning is now safer, faster, and smarter with these lightweight carbon fiber tools.

- Reduce workplace injuries—super lightweight.
- All overhead tools are black and anti-static.
- Interlocking head for adjustable length with 15 m (50') of reach from the ground.
- Quick assembly—no scaffolding needed.
- Small operational footprint.

Zefiro EV AP 500 Dust Collector

Designed to collect suspended dust particles in working environments. An electric fan allows the machine to reach high airflow levels at a constant top vacuum performance. The machine can be either supplied with a suction arm installed on it or added directly onto the assembly line. ATEX certified version is also available.

Features:

- Applications of dry, light, and fine suspended particles of dust.
- Ideal for 24/7 production cycles.
- Complete powder coated steel structure.
- Offers polyester L class with manual filter cleaning system.
- High airflow dust collector.
- Options single or double arm for localized suction (sold separately).

Voltage:	230 V or 460 V - 60 Hz	Dimensions:	24" x 25" x 87"
Power:	3.5-HP	Weight:	221-lb
Waterlift:	14.2"	Noise Level:	72 dBA
Airflow:	765.2 CFM	Suction Inlet:	150 mm
Capacity:	26-gal	Filter Surface:	32 sq. ft.

Optional Accessories

473-1252	6" Dia x 10' Suction Arm for Dust Collector	EA
473-1351	150 to 150 mm (6" to 6") Iron Flanged Reducer	EA
473-1353	150 to 100 to 100 mm (6" to 4" to 4") 2-Way Iron Flanged Reducer	EA

Zefiro EV AP 560 Dust Collector

Designed to be directly integrated into production lines and to collect light chips and fine suspended dust at the source. This machine can be either supplied with a suction arm installed or be directly installed on production lines. Ideal and safe for the recovery of very thin chips, guaranteeing top recovery efficiency.

Features:

- Nylon air exhaust diffuser.
- Ideal for 24/7 production cycles.
- Complete powder coated steel structure.
- Offers polyester anti-static M class with manual filter cleaning system.
- High airflow dust collector.
- Accessory basket included.
- Options single or double arm for localized suction (sold separately).

Zefiro EV AP 560 PN Dust Collector

An automatic reverse pulse system on this model cleans the filter cartridges to maximize performance and avoid breaks in productivity. The electric fan allows the unit to reach a high airflow level and constant top vacuum performance. The machine can be either supplied with a suction arm installed on it or added directly onto the assembly line. ATEX certified version is also available.

Features:

- Pneumatic reverse pulse cleaning system.
- Nylon air exhaust diffuser.
- Removable collection tank.
- Complete powder coated steel structure.
- Four cartridge filtration system.
- Options single or double arm for localized suction (sold separately).

Voltage:	230 V or 460 V - 60 Hz	Dimensions:	31" x 33" x 98"
Power:	3.5-HP	Weight:	276-lb

Mistral 301 DS Industrial Vacuum

Perfect starter vacuum for plants needing to manage small to medium amounts of dust. Compact, but has plenty of power with its single-phase motor. This machine is user-friendly, and extremely safe with its large surface industrial filter.

Features:

- Automatic start/stop option for power tool connections (600 watt socket).
- For dry applications only.
- Dustop filter cleaning system using pressure differential.
- Stainless steel tank and chamber options available.
- Powerful bypass motor with independent cooling.

Voltage:	115 V - 60 Hz	Dimensions:	18" x 19" x 33"
Power:	1.3-HP	Weight:	55-lb
Waterlift:	90.1"	Noise Level:	74 dBA
Airflow:	105.9 CFM	Suction Inlet:	50 mm
Capacity:	3.4-gal	Filter Surface:	22 sq. ft.

Stock #	Description	Unit
473-1055	301 DS Vacuum	EA

Replacement Filters

473-1376	Class M Cartridge Filter	EA
473-1001	Class H HEPA Filter	EA

Mistral 452 Industrial Vacuum

Ideal for cleaning and handling small and medium amounts of materials/collecting dust in the food and pharmaceutical industries, and the cereal milling industry. Extremely flexible and robust, it combines the sturdiness and performance of a true industrial vacuum system, while being very easy to use. Can simultaneously pickup solids, powders, and liquids with a floating device, and was built to sustain high heat levels of applications such as oven cleaning.

Features:

- 100% steel construction.
- High filtration efficiency and filter clogging detector.
- Integrated filter cleaning system.
- Detachable collection bin with possibility of using disposable bags.

Mistral 202 DS Industrial Vacuum

A versatile and lightweight machine that solves cleaning and dust extraction problems from any type of laboratory or production plant. Its compact size ensures easy mobility without lacking power and performance. This vacuum has a AISI 304 stainless steel construction and polyester PTFE filter with additional HEPA filtration.

Features:

- Best filtration of its category.
- Extra filter surface and indicator light.
- Dustop cleaning system using pressure differential.

Voltage:	115 V - 60 Hz	Dimensions:	23" x 19" x 43"
Power:	2.7-HP	Weight:	77-lb
Waterlift:	90.1"	Noise Level:	76 dBA
Airflow:	211.9 CFM	Suction Inlet:	50 mm
Capacity:	5-gal	Filter Surface:	32 sq. ft.

DM 3 Industrial Vacuum

Easy to use system with three powerful single-phase motors with independent cooling, a large filter with 3 sq. m. surface area, and a 100 L container, making it suitable and safe for any industrial application involving picking up wet or dry dust solids and liquids. Suitable for work environments where ongoing cleaning is recommended, such as food and beverage, pharmaceutical, and metal industries.

Features:

- 100% steel construction, compact, and sturdy.
- Integrated manual filter shaker.
- Easy filter replacement.
- Detachable collection bin with possibility of using disposable bags.
- Cord wrap and accessory caddy.

Voltage:	115 V - 60 Hz	Dimensions:	30" x 26" x 59"
Power:	3-HP	Weight:	187-lb
Waterlift:	80.9"	Noise Level:	76 dBA
Airflow:	282.5 CFM	Suction Inlet:	80 mm

473-1155	Disposable Bag Ring Holder	EA
473-1003	Anti-Static Disposable Waste Bag	EA

DM 40 WD Industrial Vacuum

High-performance system with the largest liquid capacity in the Delfin range. Features a detachable container with the option to use disposable bags. This vacuum combines great portability with outstanding functionality and three bypass motors, which provide an ironclad solution for workplaces that consistently encounter the pooling of thick liquids.

Features:

- 100% steel construction.
- Integrated filter cleaning system.
- Optional extra-large star filter.

Mistral 802 WXP w/ Pump Industrial Vacuum

Perfect for cleaning plants that are burdened by a lot of liquid waste mixed with dust. Has two powerful single-phase motors, and features a AISI 304 stainless steel liquid container with immersed pump, which makes it possible to suck up and discharge liquid simultaneously. Discharges 26 GPM.

Features:

- 100% steel construction, compact and sturdy.
- Polypropylene anti-foam 300 micron wet filter.
- Floating device and liquid discharge hose.

Voltage:	115 V - 60 Hz	Dimensions:	21" x 23" x 42"
Power:	2.7-HP	Weight:	110-lb
Waterlift:	90.1"	Noise Level:	76 dBA

Air 45 2V Industrial Vacuum

Ideal for picking up dust and solids mixed with liquids in places where compressed air is preferable to electric energy. This compressed air option features two powerful air-driven Venturi units, which are maintenance free, a large surface anti-static filter with handy manual shaker, and a 12-gallon detachable container with the option of using bags.

Features:

- 100% steel construction.
- High filtration efficiency.
- Integrated automatic filter cleaning system.
- Low noise level.

Air Supply Pressure:	87 psi	Dimensions:	23" x 25" x 47"
Air Supply Hose:	3/8"	Weight:	108-lb
Waterlift:	164.6"	Noise Level:	73 dBA
Airflow:	176.6 CFM	Suction Inlet:	80 mm
Capacity:	12-gal	Filter Surface:	30 sq. ft.

473-1003	Anti-Static Disposable Waste Bag	EA

Air DM 19V Industrial Vacuum

Air operated, and ideal for sucking up dust and solids mixed with liquids in places where compressed air is preferable to electric energy. Features one potent, compressed air-driven multi-Venturi suction unit, with no need for routine maintenance. The large 26-gallon detachable container ensures there's plenty of collection capacity.

Features:

- 100% steel construction, compact, and sturdy.
- Integrated manual filter shaker.
- Simultaneous suction of powders, liquids, and solids.
- Detachable collection bin with possibility of using disposable bags.

Air Supply Pressure:	87 psi	Dimensions:	24" x 24" x 63"
Air Supply Hose:	3/8"	Weight:	176-lb

Complete your Industrial Vacuum Program with Shadow Boards from Nelson-Jameson

- Organize your tools, supplies, equipment, and materials.
- Shadow outlines with words to identify where tools should be when not in use.
- Account for missing tools and equipment, avoid time wasted looking for and replacing them, and ensure availability when needed next time.
- Shadow Boards can be designed to any size and style you require—use any color, include logos, messages, symbols, or even full color images.

Pro Series Acrylic

- Designed for food processing and washdown environments.
- Subsurface ink will not chip, peel, or deteriorate.
- Pressure washable.
- Temperature range: -30° to 190°F.
- Antimicrobial properties.

Call today to start creating your custom Shadow Board.
