

Clean hands are the first line of defense against product contamination.

Hand Hygiene Products

Hand Soaps

GOJO® NXT® Liquid Soap System

Innovative NXT dispensers provide twice as much product in the same space that a traditional bag-in-a box system uses. Helps ensure that employees will not run out of product. Requires filling half as often, saving time and money. See page 8 for dispenser options.

E2: Acceptable for use as a handwashing and sanitizing compound (E2) for use in and around food processing areas.

GOJO® FMX™ Foam Soap System

The FMX system provides more handwashes than the traditional liquid soap dispenser. Air is infused into the soap as it's dispensed, creating a rich, luxurious lather. One push delivers a generous portion of foam so users don't need to take a second push—using less product, changing out less refills, and saving you money. See page 8 for dispenser options.

Stock #	Mfg#	Description	Packaging	Unit

GOJO® TFX™ Touchless Foam Soap System

Eliminate the need to touch the dispenser which will help reduce possible contamination. Dispenser provides a 0.6 mL 'shot' of product when hands are placed below the dispenser. Uses (2) C Cell batteries (not included). Not recommended for areas where dispensers are routinely washed down. See page 8 for dispenser options.

Alpet® E2 Sanitizing Foam Soap

Ideal foam soap for all food processing environments. Powerful 1.5% chloroxylenol (PCMX) formula is effective against many common foodborne pathogens. Each gallon provides over 3,150 applications and the 1250 mL refills provide over 1,600 applications, providing efficiency and saving money. Kosher, Pareve, and Halal certified. See pages 6-9 for dispenser options.

Alpet® Q E2 Sanitizing Foam Soap

Similar to Alpet E2 and just as equally suited for the food industry, but engineered with a Benzalkonium Chloride (BAK) formula and additional moisturizers. A very cost-effective product that still provides over 3,150 applications per gallon and over 1,600 applications per 1250 mL refill. Kosher, Pareve, and Halal certified. See pages 6-9 for dispenser options.

E3 Hand Sanitizers

Acceptable for use as a hand sanitizing product in and around food processing areas, and provides pathogen protection beyond what handwashing alone can do. Can be used after adequately washing hands with an E2 Rated Hand Soap and throughout the workday as needed. Anytime a worker touches their face, scratches themselves, or in any way contaminates their clean hands, hand sanitizer should be reapplied to reduce the rise of cross-contamination. Dispensers should be located a sufficient distance from the processing line to prevent accidental product contamination.

764-2117

Prizefighter Touchless Dispenser

Perfectly suited for demanding food industry production environments, the Prizefighter is an automatic, watertight dispenser, constructed of stainless steel and ideal for use in wet or dry environments. Infrared sensors detect the presence of hands and dispense a pre-measured application of HACCP Q E2 Liquid Soap or Alpet® Hand Sanitizer Spray. The Prizefighter features a 3000 mL capacity reservoir and polycarbonate sight glass for easy monitoring of liquid levels. 110V AC, hardwire ready and lockable.

VersaClenz Dispensing System

An all-in-one hand hygiene system, the VersaClenz will dispense a spray, foam or liquid, soap or sanitizer. Using the versatile VersaClenz cartridge system, the automatic dispenser will hold the same bottles as its manual counterpart. Each dispenser is shipped with a sheet of product stickers, allowing the user to identify which product is being dispensed. Automatic dispenser uses (4) D Cell batteries (included) providing approximately 100,000 applications. Automatic dispensers are recommended for dry area placements where they are not washed down: production area entry points, restrooms, break areas, cafeterias, and offices. ADA compliant. Lockable dispenser.

Scott® Hard Roll Towel

Through a unique technology called Hydroflex™ Compression, Kimberly-Clark compressed more towels into the same space as their regular roll towel without sacrificing quality. Towels “bounce back” when dispensed, so absorbency and strength are excellent. High capacity roll requires fewer roll changes and less maintenance. No need for oversized roll or dispenser. 1-ply. White.

Hygienic Hand Drying

Proper hand hygiene has the potential to prevent disease and cross-contamination. After properly washing hands, they should also be properly dried. Reduce waste and time with large hard roll towels or continuous hand towels. These towels are efficient, durable, and will require less time and effort. Saving you time and money is important to us and we want to make sure your facility is equipped with proper hand hygiene materials. Contact us for product recommendations or a quote.

Hard Roll Towel/Continuous Towel Characteristics:

- Uses less time to dry hands.
- Can service multiple users quickly.
- Beneficial against spreading bacteria and can better remove bacteria from hands.
- Quiet.
- Larger rolls or using the continuous dispenser will allow for less stocking/roll changes—Use one at a time dispensing to reduce waste and consumption.
- Multi-Use—can be used to dry hands/counters/faces, blow noses, or touch dirty handles/surfaces.

Hot/Jet Air Dryer Characteristics:

- Takes longer to dry hands.
- Can only service one visitor at a time.
- Spreads bacteria up to 3' from the unit and can increase bacteria on hands.
- Noisy and disruptive to visitors—can be harmful to hearing.
- No worries about refills/long-lasting.
- Can only be used to dry hands.

Tork® Washstation Dispenser

Hygienic, one-at-a-time paper towel dispenser that offers a high level of water resistance and accommodates a large capacity refill. Save on cost, labor and waste with a watertight dispenser that protects refills from spray downs or in wet areas. And, at 1,150' of quick-absorbing towel, the Tork Washstation Dispenser holds the longest refills on the market, so you don't have to reload as often. HACCP & NSF certified.
