Detection of contaminants is a key part of food safety. Increasingly demanding government regulations continue to fuel the importance of using metal detectors and x-ray machines to detect and reject harmful and intrusive objects. These objects can damage equipment, cause injury, or result in a recall if your product has reached the end user. Using metal detectable or x-ray visible items in conjunction with guidelines can drastically reduce the likelihood of anything contaminating your product.

If you use metal detectors or x-ray equipment at your facility, we can help enhance your HACCP and GMP programs with our wide line of metal detectable and x-ray visible products. From safety supplies to processing tools, we can help ensure your product's integrity.

## X-Ray Visible

X-Ray machines have an advantage over metal detectors in that they can detect a wider range of foreign bodies. As the x-ray passes through the food product, anything in it that is denser than the product will make a change in the detection. There are limitations to what an x-ray machine can detect including plastic (that isn't metal detectable), hair, and insects.

## BRC Compliant

BRC is a globally recognized third party certification program trusted by company's worldwide. BRC has a highly experienced technical team that provides support and answers technical questions. All products from Detectamet are BRCGS compliant.

## Why Color-Code?

A complete color-coded system helps promote organization and efficient workflow. Designating critical control areas and zones helps your sanitation program by ensuring that the tools stay in the areas in which they are meant to be used, doing jobs they are meant to do. Color-Coded systems also help avoid bacterial and allergen migration within a facility, allowing you to maintain a safe food processing facility. We have a variety of Color-Coded, Metal Detectable products available throughout this flyer.

Promote Organization  
and Efficient Work Flow

Designate Critical  
Control Areas and Zones

Reduce the Risk of  
Cross-Contamination

Avoid Bacterial and  
Allergen Migration

Detectamet's metal detectable pens are produced from a specially formulated food contact approved polymer that combines metal and x-ray detectability. The pen bodies are flexible and shatterproof making them ideal for use in food processing plants to help achieve safety and compliance.

Choosing a pen is dependent on the type of facility you have. To make this choice easier, we have included icons in our flyer that correlate to the type of facility each ink will work best in. Using the icons on the left, you can match your plant's environment to the pen(s) that will work best for you.

You will also notice for each pen, whether it can be refilled using one of our refillable pen cartridges. Refilling your pens is a great way to save money and time by having a new ink cartridge ready when you need it.

### Optional Colors Available:

Not available for all pen configurations, call us for details.

#### Pen Housing Colors:

- White
- Red
- Yellow
- Blue
- Green

#### Ink Colors:

- Red
- Blue
- Green
- Black

#### General Environments

**Solution:** Detectamet's pens are ergonomically designed for long periods of use.

#### Freezing Environments

**Solution:** Cryo pens can write in extreme low temperatures down to -20°C (-4°F) in areas such as cold stores.

#### Powdered Environments

**Solution:** Detectamet has developed a cryo pen that avoids clogging up and will continue to write. This is most useful in mills and bakeries.

#### Chilled Environments

**Solution:** We have gel and cryo pens that works in low temperatures ideal for use in chilled areas.

#### Wet/Damp Environments

**Solution:** The specially developed Detectamet cryo ink refill that won't smear when used in damp areas.

#### Enclosed Environments

**Solution:** For tight environments you need a pen that can write at unusual angles which our cryo pens can achieve.

#### Refillable

This pen can be refilled from our ink selection.

### Body Styles

With Clip

With Lanyard

Without Clip

## Retractable Elephant Pens

- Slightly textured finish and triangular cross section for a comfy yet sturdy grip that is suitable for use in most environments.
- Manufactured from food contact approved materials.
- Ink and pen housing are the same color.
- Refills available—see page 5.
- 25/box.

**X-RAY VISIBLE!**

### Standard Ink

- Performs well in ambient working temperatures, and a clean environment.

## Economy Retractable Pen **X-RAY VISIBLE!**

- Designed to satisfy the basic requirements for performance and detectability by metal and x-ray monitoring systems used in the food industry.
- Produced with a food contrast blue plastic shell.
- Choose red, blue, green, or black ink in a standard cartridge.
- The color of the end cap matches the ink.
- Ridges at the point of grip to make pen easier to hold firmly in wet and greasy work environments or with gloved hands.
- Pens are 50/box.
- Ink refills are 100/box.

## Fine Tip Permanent Marker X-RAY VISIBLE!

- Metal detectable, x-ray visible, and antimicrobial.
- Most suited for writing on labels and shiny/greasy paper. Performs well in cold and frozen applications with a temperature range of -4° to 140°F.
- Cap is made of metal detectable plastic and has a magnetic clip attached for extra security.
- Please note that due to the nature of the ink used, without the cap the ink will dry out.
- Store horizontally.
- Blue housing.
- 10/pack.

## Plastic Stopwatch

- Provides precise timing for all your test procedures in all types of environments including greasy, powdery, or cold conditions.
- Made from high-impact, non-shattering plastic material so it will not easily damage if dropped.
- Compact and lightweight, measuring 3" x 2".
- Includes a 30" beaded chain for convenient attachment to a clipboard or lab cabinet.
- Features hour/minutes/seconds, 1/100th of second, day/date and month and alarm time settings.

**Stock #**   **Unit**

**364-7048**   EA

## Handheld Calculator

**X-RAY VISIBLE!**

- High-impact blue housing and buttons are metal detectable, x-ray visible, and antimicrobial.
- Suitable for most food environments including greasy, powdery, and cold conditions.
- Lightweight and small enough to hold in your hand or attach to a clipboard.
- Includes (2) AAA batteries.
- Features a % and mark up key.
- Measures 3" x 4.25".

## Rubber Knobby Mat™

- Knobby surface on both sides to allow for circulation of air or liquid.
- Mat with "X" helps prevent cross-contamination—use solid colored side for product contact.
- Formulated of FDA approved materials.
- Features (3) 0.75" die-cut hanging holes for use with stainless steel mat hanger (141-2200).
- 21" x 27".

### Stock # Color Unit

**Other metal detector calibration tools available upon request...  
test cylinders, whips, wands and more!**

**Customized sizes available to meet your application needs.**

### What is the Smallest Piece of Foreign Object that can be Detected by a Metal Detector?

This answer varies greatly. It is dependent upon the material of the contaminant itself, the speed of the line and the moisture content. The height of the detector head from the line is the most critical variable, as sensitivity decreases as height increases.

### How do you Maintain Calibration?

You want to periodically check calibration by passing a known calibration test tool under the unit to check for accuracy. These can be made of ferrous, non-ferrous, or stainless steel, and come in the form of rods, cylinders, balls, whips, cards, and more.

### How do you Adjust your Metal Detectors?

Machines must be calibrated to the food they are processing and then set to a threshold, determined by the company in regards to the size of the contaminant they want the detector to reject. The type of product passing through the detector (wet or dry), its size, and speed affect the setting. The metal detector manufacturer can assist with calibration setup.

### What Happens if you Don't Test your Calibration?

The metal detector can allow larger pieces of foreign contaminant to get through compared to the threshold setting threatening the finished product's safety.

## Need a new metal detector or parts?

Give us a call! We can assist with standard and custom metal detection solutions.

## Detectable Brushes & Brooms

X-RAY VISIBLE!

**NEW**

- Fully metal detectable, x-ray visible and food grade. These brushes and brooms were created to be durable, resistant, easy to clean, and ergonomic. Autoclavable at 270°F.

### Dura-Ball Metal Detectable Screen Cleaning Balls

**NEW**

- Homogenous blend of magnetically-reactive material.
- Entire ball from surface to core has strong attraction to magnetic fields.
- FDA acceptable for direct food contact.

Stock #	Dia	Unit
604-8401	5/8"	EA
604-8400	2"	EA

### LKH Pump Seal Kit

- OEM Alfa Laval metal detectable shaft seal.
- Made of metal detectable EPDM elastomers.
- Includes (1) stationary seal ring, (1) o-ring for stationary, (1) rotary seal ring, and (1) o-ring for rotary.
- Metal detectable EPDM service kits LKH pumps also available.

Stock #	Fits	Materials
383-1420	LKH 5-60	Carbon/Silicon Carbide
383-1870	LKH 70-90	Carbon/Silicon Carbide
383-2210	LKH 5-60	Silicon Carbide/Silicon Carbide
383-2370	LKH 70-90	Silicon Carbide/Silicon Carbide

### Rubber Sheetting

- FDA food grade.
- Metal detectable blue silicone rubber material.
- Great for gaskets and seals.
- Temperature Range -76° to 392°F.
- 2000 mm x 1000 mm rolls.

**NEW**

Stock #	Thickness	Unit
364-9001	1.5 mm	RL
364-9002	2 mm	RL
364-9003	3 mm	RL
364-9004	4 mm	RL

364-9006	6 mm	RL
364-9010	10 mm	RL

**DETECTAMET**

Other metal detectable/x-ray visible products include O-Rings, orifice gaskets, screen gaskets, John Perry, I-line, bevel seat gaskets, and custom sheets in a variety of colors, sizes and thicknesses.

**Call our process systems department for details.**

## Safety Knives

It's imperative you use the correct knife for the job to reduce the risk of potential contaminants. Each type of packaging below has a unique icon to help you select the right knives for your application.

### Cardboard

### Pallet Strapped Boxes

### Sacks/Plastic Bags

### Plastic Netting

### Plastic Film

### Plastic Adhesive Tape

### Film Wrapped Boxes

### Bubble Wrap

### Plastic Strapping

## Multipurpose Safety Knife

- Disposable knife for light use.
- Body is made of impact resistant, metal detectable polypropylene for durability and is food contact approved.
- Hygienic, molded in shielded stainless steel blades for added safety.
- Pointed nose allows for insertion of the cutter into all types of paper and plastic.
- Available with or without hook blade or with tape slitter.

Stock #	Color	Unit
---------	-------	------

### DETECTAMET

#### Without Hook Blade or Tape Slitter

364-2417	Red	BX
364-2418	Yellow	BX

### DETECTAMET

## Retractable Safety Knife

- Blade locks in the 'out' position while a controlled cut is being made. If the knife is jerked, shaken or dropped, the blade will retract.
- Blade lock control for safe storage.
- Easy blade change.
- SS straight replacement blades are 10/pack.

**DETECTAMET**

Stock #	Description	Unit
364-2638	Safety Knife with Plastic Blade Carrier	EA
364-2639	Safety Knife with Aluminum Blade Carrier	EA
364-2648	Replacement SS Straight Blade	PK

## Safety Knife With Retractable Hook Blade

- Stainless steel blade is molded into the metal detectable plastic.
- Patented 'opposed exits' at the back of the blade.
- Spring loaded auto retractable hook blade.

**DETECTAMET**

Stock #	Unit
364-2643	BX

## Smartcut Safety Knife

- Disposable, ambidextrous, spring-loaded safety knife.
- Designed specifically for packaging materials.
- Non-replaceable stainless steel blade.

**MARTOR®USA**

Stock #	Description	Unit
445-2054	4"L Safety Knife	EA

## Retractable Safety Knife

**NEW**

- Blade locks in the 'out' position while a controlled cut is being made.
- Blade retracts once contact with cutting surface is lost.
- Easy blade change—just slide the blade mount insert back.
- Replacement blades are 100/box.

**MARTOR®USA**

Stock #	Description	Unit
445-2019	Stainless Steel/Blue Self Retracting	EA
445-2016	Stainless Steel Blades	BX

## Bag Cutter

- Specifically designed to cut multi-layer paper or plastic.
- Molded in stainless steel blade for added safety.
- Patented opposed slopes at the back of the blade reduce friction resistance which enables a smooth and more effective cut.

Stock #	Color	Unit
364-2430	Blue	BX

**DETECTAMET**

## Heavy-Duty Safety Knife

- Unique patented valley guides the material to be cut directly along the surgical steel blade taking the strain off the operator.
- Fast blade change.
- Easy to clean.
- Suitable for cutting cable ties, rope, string, and netting.
- SS straight replacement blades are 10/pack.

**DETECTAMET**

Stock #	Description	Unit
364-2641	Heavy-Duty Safety Knife	EA
364-2642	Replacement SS Straight Blade	PK

## Box Cutter With Hook Blade

- Automatic spring-loaded finger guards protect and retract when cutting, leaving only the blunt edge of the hook blade exposed when knife is not in use.
- Hook blade punctures the box and prevents damage to contents.
- Straight blade cuts conventionally at a 45° angle.
- Thumb grip for superior control.
- Internal storage for new and used blades.
- Replacement blades are 10/pack.

**DETECTAMET**

Stock #	Description	Unit
364-2634	Box Cutter	EA

## Cheese Inspection and Contaminant Detection Systems

Nelson-Jameson is proud to partner with Valcour Process Technologies to provide our customers with the equipment needed to inspect a wide assortment of product to prevent contamination. The Shield Allegro is a powerful x-ray inspection system that provides a higher level of inspection over traditional metal detectors.

While metal detectors provide reliable and robust contaminant detection technology, x-ray inspection technology helps to ensure improved product quality by providing these additional benefits:

- Designed to inspect a wide assortment of packages up to 450 mm (17.7") wide and 254 mm (10") high. Products are typically inspected after packaging but can be inspected as raw product or packaged in a box.
- Detects smaller sizes of stainless steel (2-2.5 mm vs. 6-8 mm), as well as a variety of other contaminants that aren't possible with a metal detector.
- Easy to use, 17" touch screen display provides a digital trail of images for each product scanned should you need to further investigate customer complaints.
- Features an optional 3-A design, software switchable detector resolution, and 24/7 remote technical support.
- Meets the rigorous quality, reliability, sanitary and capability expectations of the U.S. and Canadian Cheese Production & Converting Markets.
- Developed and made in the USA.

## Understanding Metal Detectors

There are three versions of metal detectors—tunnel (typical for cheese), pipeline (for fluid products), and free fall (for powders). Detectronics makes sanitary designed metal detectors suitable for the wash down environment in Cheese and Protein Processing. Replacement metal detector heads available for most existing MD conveyors. The latest version features color HMI with flexible user programming.

- Tough and robust structure of stainless steel.
- Cost effective and extreme reliability.
- Hygienic design and compliant with IP67/IP69K/NEMA4.
- Digital signal processing with very sensitive software.
- Low false reject rate due to ESP signal processing system.
- Modular conveyor belt integrated with metal detector and reject systems.
- Full compliance with HACCP criteria.
- Can be equipped to meet e.g. IFS, BRC, M&S requirements.
- DETECTRONIC uses only food-compatible parts that are FDA & USDA compliant.
- Variable speed drive as standard.
- High level of electronic and mechanical reliability.
- Worldwide installations.
- Made in Denmark.

**Reusable Earplugs**

**3M™ E-A-R™ Ultrafit™ Earplugs**

- Proprietary, premolded, triple-flange design fits comfortably in most ear canals.
- Hypoallergenic polymer is washable/reusable.
- Stainless steel ball bearing embedded into the plug and an impregnated cord.
- NRR: 25.
- 100 pair/box.

Stock #	Description	Unit
196-2075	Plugs with cord	PR

**3M™ E-A-R™ Express™ Pod Plugs™ Earplugs**

- Advanced “no-roll” yellow foam tips and blue paddle-style grips to make getting a good fit easier.
- Stainless steel ball bearing embedded into the plug and an impregnated cord.
- NRR: 25.
- 100 pair/box.

Stock #	Description	Unit
196-2072	Plugs with cord	PR

**Jackson Safety\* H2O Earplugs**

- Thick stem for easy insertion/removal.
- Three soft flanges conform to the ear canal.
- Metal is embedded in the blue plug.
- NRR: 26.
- 100 pair/box.

Stock #	Description	Unit
371-2745	Plugs with cord	BX

**Expand-A-Band Hearing Protector**

- Adjustable headband and silicone ear pieces are 100% metal detectable and x-ray visible.
- Accommodates different head sizes with comfort.

Stock #	Description	Unit
364-7031	Band	EA
364-7033	Replacement Tips	CA

**DETECTAMET**

**3M™ E-A-R™ Push-Ins™ Earplugs**

- Soft polyurethane foam tips and blue stem makes fitting and removal easy.
- Stainless steel ball imbedded in plug and an impregnated cord.
- NRR: 28.
- 200 pair/box.

Stock #	Description	Unit
196-2062	Plugs with cord	BX

**3 Flange Earplugs**

- Hygienic silicone is washable/reusable.
- Blue plug and cord are 100% metal detectable and x-ray visible.
- 100 pair/box.

Stock #	Description	Unit
364-2657	Plugs with cord	BX

**DETECTAMET**

**What Makes Products Metal Detectable?**

In plastic products such as scrapers, pens, and vinyl gloves, a unique manufacturing process involving the inclusion of a metallic pigment enables the plastic to be detected. In other products such as earplugs, a stainless steel ball bearing is enclosed in the plug to make them detectable.

**Looking for More Safety Products?**

### 3M™ E-A-Rsoft™ Earplugs

- Soft, pliable slow recovery foam for excellent noise reduction and comfort.
- Stainless steel ball imbedded in plug and an impregnated cord.
- NRR: 32.
- 200 pair/box.

Stock #	Description	Unit
196-2045	Plugs with cord	BX

### Howard Leight™ Lasertrak® Earplugs

- Bright orange and blue plug with metal grommet.
- Blue vinyl cord.
- NRR: 32.
- 100 pair/box.

Stock #	Description	Unit
197-2510	Plugs with cord	BX

### 3M™ E-A-R™ Classic™ Earplugs

- Constructed from slow-recovery, low-pressure foam.
- Stainless steel ball imbedded in the plug and an impregnated cord.
- NRR: 33.
- 200 pair/box.

Stock #	Description	Unit
196-2018	Plugs with cord	BX

### Jackson Safety\* H10 Disposable Earplugs

- Soft, bullet-shaped roll down foam blue earplugs.
- Metal is embedded in the earplug for quick detection.
- NRR: 31.
- 100 pair/box.

Stock #	Description	Unit
371-2735	Plugs with cord	BX

### 3M™ E-A-Rsoft™ SuperFit™ Earplugs

- Features the proprietary SuperFit fitting ring to help insure proper fit.
- Stainless steel ball bearing imbedded into the plug and impregnated cord.
- NRR: 32.
- 200 pair/box.

Stock #	Description	Unit
196-2019	Plugs with cord	BX

### What is a NRR Rating?

Noise Reduction Rating is the measurement, in decibels, of how well a hearing protector reduces noise. The higher the number, the greater the protection.

### Why Blue?

Many metal detectable products are colored blue for two reasons:

1. Easy visual detection
2. It is the most common non-food color.

### What is the Difference Between Embedded Metal & Impregnated Material?

A product with embedded metal is only detectable if the product piece containing the metal goes through a detector. With a product that is impregnated, the entire piece has fine metal particles throughout, making the entire piece, or parts of it, detectable.

### Disposable Earplugs

- Fully detectable and x-ray visible, these corded earplugs feature a metal insert inside the foam plug and cord.
- The soft roll-down foam allows for easy insertion, and is free from latex, silicone, and phthalates.
- NRR: 32.
- 250 pair/box.

Stock #	Description	Unit
364-7754	Yellow plug with Blue cord	BX
364-7744	Blue plug with Blue cord	BX

X-RAY VISIBLE!
